eduGAIN for Students, Researchers and Staff

eduGAIN helps nearly 27,000,000 students, researchers and educators access online services while minimising the number of accounts users have to manage – reducing costs, complexity and security risks.

GÉANT

eduGAIN enables institutions to easily and scalably support access to services globally – allowing control over user management

So you've put an effort...

...and joined eduGAIN, what's next?

You need more effort to grow your federation!

Good idea is to start from informational website

Host services for users

Single Sign-On as a Service - for these organizations, that have users database (AD/LDAP)

Identity Management as a Service - for the rest

Organize support

Prepare sandbox for newbies

It's good to have local testing environment before joining production federation

Check for compliance issues

Give some candies for organisations

- Filesender - for large files transfer
- Nextcloud/Owncloud - for file sync and share
- Moodle - virtual learning environment
- Other ideas are welcome!

Provide training

“Understanding how little we know
is crucial to gaining knowledge.”
— Eraldo Banovac

Monitoring is very important!

Nagios[®]

Don't forget to update your knowledge

REFEDS

If you did everything right...

...you can expect good yield
for the next autumn!

Thank you!
